

Still running your business across ten apps that **don't talk to each other?**

What if one platform ran it all: projects, finance, clients, payroll and Singapore compliance, with a team of **AI agents doing the actual work?**

B.O.S. is the Business Operating System that replaces your scattered tools with one intelligent hub. No double entry. No copy-pasting into external AIs. No stack of subscriptions that never connect.

Struggling to keep track of who has your data? Your calendar, email and files stay in one place you control, not spread across a dozen vendors.

EVERYTHING YOUR BUSINESS RUNS ON, IN **ONE SYSTEM**

- AI agents that plan, review and execute
- Invoices, expenses, banking and reports
- IRAS tax and ACRA XBRL filing
- Contracts and e-signatures
- Projects, tasks and monthly planning
- Payroll with CPF, IR8A and payslips
- CRM, sales pipeline and client portal
- Meeting recording and transcription

Save money.

One platform instead of a dozen subscriptions.

Save time.

No double entry, no copy-paste to outside AIs.

Protect your IP.

Fewer parties holding your business data.

See it for yourself.

The brochure gets you curious. The platform closes the deal.
